EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative on October 28, 2009.

The application has been amended as follows: Claim 1 has been amended at line 3 to now recite: generating a set of partial images **that are generated from complete images of characters belonging to a character set** that form a complete image of a keypad. Claim 4 has been amended to recite: The method of claim 1, wherein said generating comprises: distributing illuminated pixels in said complete image **of a character** among two or more partial images based upon pixel group. Claim 5 has been amended at line 2 to recite: no information of said complete image **of said keypad**. Claim 10 has been amended at line 3 to recite: means for generating a set of partial images **that are generated from complete images of characters belonging to a character set** that form a complete image of a keypad. Claim 12 has been amended at line 4 to recite: generating a set of partial images **that are generated from complete images of characters belonging to a character set** that form a complete image of a keypad. Claim 18 has been amended at line 4 to recite: means for generating a set of partial images **that are generated from complete images of characters belonging to a character set** that form a complete image of a keypad. Claim 22 has been amended

at line 4 to recite: generating a set of partial images **that are generated from complete images of characters belonging to a character set** that form a complete image of a keypad. Claim 24 has been amended at line 4 to recite: receiving a set of partial images from a remote computer, the set of partial images **being generated from complete images of characters belonging to a character set and** forming a complete image of a keypad.

2. The following is an examiner's statement of reasons for allowance: The prior art of record, Vale (US Patent No. 6,359,572) teaches a keypad that is able to change its appearance and the position of keys (numbers) on the keypad. Maddalozzo, Jr. et al. teaches that a keypad is able to shift digit location to protect a user's password entry information. The prior art fails to teach or suggest that the keypad is formed of partial images that are generated from complete images of characters belonging to a character set that form a complete image of a keypad. There is no teaching or suggestion of combination in the prior art to display only partial images of numbers on the keypad during each frame, allowing for the user's visual persistence to identify each character to the user while protecting the user's input from spyware.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ILANA SPAR whose telephone number is (571)270-7537. The examiner can normally be reached on Monday-Thursday 8:00-4:00 EST.
